In this book, scientists from various disciplines address the advances in seafood research with respect to quality, safety, consumer's demands and processing of wild and farmed fish. The nutritional properties of marine lipids and lipid oxidation from model systems to seafood are presented. Several contributions on the effects of natural anti-oxidants to prevent oxidation are also included. Effects of dietary factors on muscle tissue quality, pre-rigor processing and brining of farmed cod are covered. The development of rigor mortis and the quality of muscle in relation to commercial and experimental slaughter techniques are also discussed. Consumer's knowledge, perception and need for information about seafood are discussed. Topics such as shelf life and microbial quality of seafood are covered in a range of contributions. Inactivation of micro organisms or biopreservation of seafood are included. Attention is paid to the development of the Quality Index Method for the evaluation of the quality of fresh fish and products. The characterisation and the quality of processed by-products are also presented. The presence of trace elements and organic contaminants in variety of seafood products is highlighted. Finally, several contributions regarding advanced methodologies to determine the quality of seafood are presented. This book will be of interest to anybody concerned with quality and safety of fish throughout the entire chain from catch to consumer.

Konica Minolta's new digital SLR camera-called the Maxxum 7D in North America and the Dynax 7d elsewhere-offers many unique digital SLR features. Magic Lantern helps users thoroughly understand all its advantages, and goes beyond the user's manual with complete instructions for operating such innovative elements as the exclusive Konica Minolta Anti-Shake System, exposure compensation settings, white balance controls, creative focus control, auto exposure, and honey-comb metering system.

Provides a comprehensive introduction to corporate finance. This is a reprint

Go far beyond the manufacturer s instruction book and take full advantage of the Konica Konica s new Maxxum 5D digital SLR camera (Dynax 5D outside North America) ensures photo-imaging excellence with Anti-Shake technology. Magic Lantern makes sure photographers get the most out of the camera s cutting-edge functions, including: an exclusive CCD-Shift mechanism that eliminates blurring caused by camera shake; the large 6.1-megapixel (effective) CCD sensor; and an advanced LSI engine for high-speed image processing. With this manual and the Quick Reference card in hand, photographers will master all the technology and be well on their way to artistic success.

This study examines France's determination to remain aloof and unaffected as the world economy threatens the French way of doing business. Describing the difficulty in initiating change in French organizations, the author tells of the obstacles he encountered in attempting to modernize the working practices of a Paris firm. His observations are based upon customs and habits peculiar to the French, yet they apply equally to all foreign cultures. Management methods, attitudes to the outside world, and the historic roots of the French mentality are viewed and explained anecdotally, based on the author's experience of living and working in France, and are accompanied by humorous illustrations.

Learn how to combine delicate watercolor illustrations with expressive hand lettering to create beautiful art and gifts. Self-taught artist Tanja Pöhl shares the tips, tricks and know-how she's learned on her creative journey so that you can fast-track your skills. Discover the materials you'll need in terms of watercolor paints, brushes, paper and pens, then get started with Tanja's exercises to learn the basic techniques of hand lettering and watercolor painting. In the Hand Lettering Know-How section you will start with some warm up exercises and practice letters, before learning faux calligraphy, bounce lettering, joining letters and more. In the Watercolor Know-How section you will learn how to handle the brush, and gain color knowledge as well as an understanding of tonal values, transparency and opacity, and learn how to create your own unique color palette. 20 amazing step-by-step painting and lettering projects then help you put your skills in action with ideas for a myriad of different applications. Create a moodboard, inspirational cards, seasonal gift boxes, a botanical table runner, a plant journal, floral greetings cards, fruity jar labels, posters, hoop art, party stationery, a birth poster, milestone cards, a height chart, recipe cards, an illustrated ABC, box frames, 3D flowers, and more - all beautifully illustrated in a modern yet timeless style. These inspiring projects are so varied and interesting, and will undoubtedly spark ideas for all sorts of other ways you can use watercolor and hand lettering together to create beautiful yet easy art. Even if you are a total beginner, this book will kickstart your creative journey with watercolor and hand lettering, showing you the techniques and giving you fun projects to try them out on. This accessible guide to easy watercolour and hand lettering techniques will teach you everything you need to make art that makes you happy! Self-taught and full of enthusiasm for experimentation artist Tanja Pöhl is your teacher and guide. She's taught thousands of beginners to find their creative voice through her workshops and classes, and can't wait to help you on your journey into the wonderful world of watercolor and hand lettering.

The author of this volume provides an insider view of the story due to her involvement with the [Russian oil] industry over a long period and her access to information from key players of the industry. . . the book is a welcome addition, especially for its sound story line. Anyone interested in the transformation of the Russian oil industry will find it a valuable work. It will also inspire researchers to analyse organisational transformation of other types of industries, especially electricity and gas in many countries around the world that have undergone radical changes in the past. Subhas C. Bhattacharyya, International Journal of Energy Sector Management Sarah Dixon has produced a fascinating look at the internal workings of four major Russian oil companies during the decade following their privatisation in the mid-1990s. Dixon has utilised her in-depth knowledge of Russia and her business experience in its thriving oil industry to gain access to Russia's powerful business titans. Her insights and careful observations have resulted in a masterful analysis of organisational transformation during Russia's radical institutional upheaval. The book is a valuable contribution to resource-based theory by explaining linkages between organisational learning, dynamic capabilities, and implementation of organisational transformation. Practitioners will also benefit from the rich case studies offering insight into constraints and enablers of organisational transformation. Sheila M. Puffer, Northeastern University, Boston, US Here the example of the Russian oil industry in the context of transition from a planned to a market economy is used to develop a three-stage framework for organisational transformation. Four longitudinal case studies of Russian oil companies are drawn upon to explain the process of organisational transformation. The book highlights how and why this process differs between companies within the same industry, explores the complexity of the change process and discusses the importance of the top management team. The links between organisational learning, dynamic capabilities and the implementation of change are analysed. An interesting insight into the constraints and enablers of organisational change is also provided. The framework developed from this study can be successfully applied to other organisations wishing to bring about organisational change. Integrating several perspectives, including a resource-based view, organisational learning, dynamic capabilities and top management team theory, this book will be of great interest to scholars and researchers of business and management, international business and organisational behaviour.
