DRC has committed to reduce its emissions effectively, efficiently, and equitably from deforestation and degradation (REDD+). The country experiences complex relationships between drivers, agents, and institutions of deforestation nationally. The REDD+ policy arena is influenced by both governmental and non-governmental actors whose number have increased in the policy arena over the years; however, weak coordination among these actors remains an issue. Since 2009, the DRC has announced several reforms relating to land tenure, land-use planning and agricultural policy, to create an institutional environment that motivates the implementation of REDD+ in the DRC. By 2019, none of these reforms had materialized, due to both political changes and a lack of finance, capacity, and political will. Between 2013 and 2019, little progress has been made on REDD+ in the DRC, as a result of conflicting interests among actors both at national and decentralized levels; information asymmetry; elite capture and corruption; and the pre- and post-election situation. To date, the effectiveness of REDD+ activities in the DRC remain unclear, due to the absence of rigorous impact assessment. However, efforts can be observed on the field where there is increased number of participants to forest policy process compared to REDD+ early years; and several ongoing projects are testing policy options within and across levels. If these efforts are sustained, they can contribute in putting in place conditions to achieve REDD+ objectives.

This systematically organized and well-balanced book compresses within the covers of a single volume the theoretical principles and techniques involved in bio-separations, also called downstream processing. These techniques are derived from a range of subjects, for example, physical chemistry, analytical chemistry, bio-chemistry, biological science and chemical engineering. Organized in its 15 chapters, the text covers in the first few chapters topics related to chemical engineering unit operations such as filtration, centrifugation, adsorption, extraction and membrane separation as applied to bioseparations. The use of chromatography as practiced at laboratory as well as industrial scale operation and related techniques such as gel filtration, affinity and pseudoaffinity chromatography, ion-exchange chromatography, electrophoresis and related methods have been discussed. The important applications of these techniques have also been highlighted.

Optimize Designs in Less Time An essential element of equipment and system design, computer aided design (CAD) is commonly used to simulate potential engineering problems in order to help gauge the magnitude of their effects. Useful for producing 3D models or drawings with the selection of predefined objects, Computer Aided Design: A Conceptual Approach directs readers on how to effectively use CAD to enhance the process and produce faster designs with greater accuracy. Learn CAD Quickly and Efficiently This handy guide provides practical examples based on different CAD systems, and incorporates automation, mechanism, and customization guidelines, as well as other outputs of CAD in the design process. It explains the mathematical tools used in related operations and covers general topics relevant to any CAD program. Comprised of 12 chapters, this instructional reference addresses: Automation concepts and examples Mechanism design concepts Tie reduction through customization Practical industrial component and system design Reduce Time by Effectively Using CAD Computer Aided Design: A Conceptual Approach concentrates on concept generation, functions as a tutorial for learning any CAD software, and was written with mechanical engineering professionals and post-graduate engineering students in mind.

Traveling around the world is one of the most fun and memorable things to do. And one of the best places to include in one's bucket list is Brazil. But here's the thing: Brazil isn't an English-speaking country and if you'd like to be able to really enjoy your trip there, it's crucial that you know important basic phrases so you can get and convey information that will enable you to get to where you want to go and do what you want to do there. Grab your copy of Brazilian Portuguese Phrase Book and learn the basic phrases you'll need to enjoy your trip to Brazil. And more than just the phrases themselves, you will also get to learn basic principles underlying the Brazilian Portuguese language that will help you learn even more words and phrases later on. The Brazilian Portuguese Phrase Book, you can easily learn to speak basic phrases for tourists so you can make sure that your trip to Brazil will be a most unforgettable one

Guidance Note 1: Selection & Erection is a fundamental guide for specifiers, installers and those inspecting and testing installations. It contains clear guidance on how to apply the relevant sections of BS 7671 and has been fully updated to BS 7671:2018. The 18th Edition of the IET Wiring Regulations published in July 2018 and came into effect in January 2019. Changes from the previous edition include requirements concerning Surge Protection Devices, Arc Fault Detection Devices and the installation of electric vehicle charging equipment as well as many other areas.

The notebook with a place for notes, but not only, ideal for children for everyday writing practice. But adults also make great use of it for taking notes. The notebook can be used for various items thanks to three types of sheets. So you don't have to carry so many notebooks in your backpack. About this notebook: 120 pages: 40 lines pages + 40 grids pages + 40 pages for practice Perfect for kids Simple design with a name space High-quality cover for a professional finish Perfect size at 8.0 x 10 in Perfect for gel pen, ink or pencils Great for drawings A nice gift!
